

reviewerforselectenterprise

Select Enterprise Model Review Technology that Speeds Design, Provides Ongoing Mentoring and Fixes Problems Automatically

Reviewer for Select Enterprise™ is a powerful design reviewer that integrates with the Select Enterprise repository. Reviewer for Select Enterprise includes:

- *Over 90 configurable BPM, Component Modeling, UML and Data Modeling design reviews*
- *Standard Browser look and feel*
- *Management and Designer summary reports*
- *Proof of design-time deliverables*
- *Detailed design reports outlining errors, consequences of not fixing them and proposed solutions, providing active mentoring*
- *Fix-It feature to speed design corrections*
- *Automated HTML generation of organizations design standards*

HOW DO YOU QUICKLY ENSURE THE QUALITY OF YOUR DESIGNS, SPEEDING DELIVERY OF BUSINESS CRITICAL IT APPLICATIONS?

Your business depends on fast and efficient application development. Quality applications delivered on time and to budget, that meet the needs of your business. How can you:

- Understand the quality of your designs, before moving to construction?
- Fix design problems automatically?
- Reduce the time you spend mentoring your design staff?
- Gain consistency between designs and designers?
- Document and communicate your design standards?
- Reduce your effort and design time by up to 40%?

APPLICATION DESIGN REVIEW: A NEW WAVE.

Aonix's Reviewer for Select Enterprise™ is the world's first automated design review tool. It reviews UML models for standards, accuracy, completeness, style, business models, data models and componentization, based upon designs within Aonix's Select Enterprise®.

Finding problems early has exponential savings later on, but sometimes it is hard to justify the effort. Reviewer typically reduces design reviews from days to seconds, giving you the advantage of early design review, without the previously unacceptable cost. Reviewer for Select Enterprise:

- Provides a set of highly configurable reviews, grouped into eight general topics
- Focuses on models, packages or diagrams
- Gives you management information about any design deficiencies
- Reports detailed errors and warnings, making it the "spell-checker" for design
- Describes any errors, the consequences of not correcting them and design patterns for correction
- Automatically fixes design problems, dramatically reducing design effort
- Documents the reviews you have configured as HTML to provide your organization with design standards

These features make Reviewer for Select Enterprise invaluable for all project managers and designers. Managers no longer have to estimate design status. Designers have continuous mentoring, support and can accelerate design improvements.

EASY TO USE. ENSURE QUALITY RESULTS

Reviewer for Select Enterprise has a web browser interface making it easy to use. Large models take seconds rather than days to review and the results are as easy to navigate as the Internet. No prior knowledge of Select Enterprise is required. Configuring design reviews is as easy as selecting check boxes. For example, you can select configuration options to:

- Ensure descriptions for elements such as Use Cases have been defined
- Ensure classes, attributes and operations have descriptions and data-types
- Check for any Java, C++, VB or Forte "key words" in your designs
- Identify multiple inheritance and cyclic dependencies, giving you a real understanding of how well prepared you are to move into the construction phase

LEVERAGE DESIGN REVIEWS THROUGHOUT THE ENTERPRISE

For designers, mentoring is clear and concise, while deep enough to ensure any problem can be fixed. You can even hot-link to the Aonix's website for the very latest design tips and useful Reviewer links. Built as a team and enterprise scale tool from the start, Reviewer for Select Enterprise can focus on one designer's area of responsibility whilst at the same time enabling review communication throughout the enterprise with sophisticated information sharing technology.

Reviewer for Select Enterprise gives you everything you need to measure the quality of your designs, identify design faults and fix them, quickly and easily. As part of Aonix's **Select Component Factory™**, Reviewer for Select Enterprise plays a significant role in ensuring quality and realizing all the benefits of component based development - "the next wave" in application development.

To find out more about how Aonix's Reviewer for Select Enterprise can help you improve the quality of your Select Enterprise models and dramatically reduce the time you spend on design visit www.aonix.com, refer to the companion data sheets or contact us with one of the following numbers.

About Company

Aonix, a Gores Technology Group company, is a leading international software company with customers drawn from the Global 1000.

The company's Select Business Solutions division provides a comprehensive suite of business software development products comprised of Select Component Factory, Select Component Manager, Select Enterprise, Reviewer for Select Enterprise, JSync, VBSync and CSync. Select Business Solutions also supports process definition, management and rollout with the Select Process Director Suite. All tools are supported by a full complement of professional services in addition to the development methodology, Select Perspective.

Headquartered in San Diego, Aonix operates sales offices throughout North America and Europe in addition to a network of international distributors. For more information, visit www.aonix.com.
